

Takeno, H; Sunakawa, K; Suezawa, M

*Temperature-dependent retardation effect of dopants on oxygen diffusion in heavily doped Czochralski silicon*

Appl. Phys. Lett. 77 (2000) 376 – 378

00-IMR0176

Markevich, VP; Suezawa, M

*Response to "Comment on 'Hydrogen-oxygen interaction in silicon at around 50 degrees C' [J. Appl. Phys. 87, 4635 (2000)]*

J. Appl. Phys. 87 (2000) 4637 – 4637

00-IMR0177

Fukata, N; Suezawa, M

*Annealing behavior of hydrogen-defect complexes in carbon-doped Si quenched in hydrogen atmosphere*

J. Appl. Phys. 87 (2000) 8361 – 8367

00-IMR0178

Fukata, N; Suezawa, M

*Formation and annihilation of H-point defect complexes in quenched Si doped with C*

J. Appl. Phys. 88 (2000) 4525 – 4530

00-IMR0179

Ikeda, K; Sekiguchi, T; Ito, S; Takebe, M; Suezawa, M

*Electron-beam-induced-current study of artificial twist boundaries in bonded Si wafers*

J. Cryst. Growth 210 (2000) 90 – 93

00-IMR0180

Huang, XM; Taishi, T; Yonenaga, I; Hoshikawa, K

*Dislocation-free B-doped Si crystal growth without Dash necking in Czochralski method: influence of B concentration*

J. Cryst. Growth 213 (2000) 283 – 287

00-IMR0181

Yonenaga, I

*Activities of dislocations in heavily impurity-doped Si*

J. Phys.-Condes. Matter 12 (2000) 10065 – 10069

00-IMR0182

Yonenaga, I; Hoshi, T; Usui, A

*High-temperature hardness of bulk single-crystal gallium nitride – in comparison with other wide-gap materials*

J. Phys.-Condes. Matter 12 (2000) 10319 – 10323

00-IMR0183

Huang, XM; Taishi, T; Yonenaga, I; Hoshikawa, K

*Dislocation-free Czochralski Si crystal growth without dash necking using a heavily B and Ge codoped Si seed*

Jpn. J. Appl. Phys. Part 2 – Lett. 39 (2000) L1115 – L1117

00-IMR0185

Yonenaga, I; Hoshi, T; Usui, A

*Hardness of bulk single-crystal gallium nitride at high temperatures*

Jpn. J. Appl. Phys. Part 2 – Lett. 39 (2000) L200 – L201

00-IMR0184

Shindo, D; Ikematsu, Y; Lim, SH; Yonenaga, I

*Digital electron microscopy on advanced materials*

Mater. Charact. 44 (2000) 375 – 384

00-IMR0186

Yonenaga, I; Hoshi, T; Usui, A

*High temperature hardness of bulk single crystal GaN*

Mrs. Internet J. Nitride Semicond. 5 (2000) art. no. – W3.90  
Res.

00-IMR0187

Yonenaga, I; Lim, SH; Shindo, D

*Dislocation dissociation and stacking-fault energies in Ge<sub>1-x</sub>Si<sub>x</sub> alloys*

Philos. Mag. Lett. 80 (2000) 193 – 197

00-IMR0188

Yonenaga, I; Suzuki, T

*Cross-slip in GaAs and InP at elevated temperatures*

Philos. Mag. Lett. 80 (2000) 511 – 518

00-IMR0189

Markevich, VP; Murin, LI; Suezawa, M; Lindstrom, JL; Coutinho, J; Jones, R; Briddon, PR; Oberg, S

*Observation and theory of the V-O-H-2 complex in silicon*

Phys. Rev. B 61 (2000) 12964 – 12969

00-IMR0190

Rat, E; Hehlen, B; Kulda, J; Yonenaga, I; Casalta, H; Courtens, E; Foret, M; Vacher, R

*Disorder broadening of the acoustic branches in Si<sub>x</sub>Ge<sub>1-x</sub> mixed crystals*

Physica B 276 (2000) 429 – 430

00-IMR0191

Suzuki, T; Tokuoka, T; Yonenaga, I; Kirchner, HOK

*Inverse brittle-to-ductile transition in gallium-arsenide under hydrostatic pressure*

Scr. Mater. 43 (2000) 645 – 650

00-IMR0192

Markevich, VP; Murin, LI; Lindstrom, JL; Suezawa, M

*Early stages of oxygen precipitation in silicon: The effect of hydrogen*

Semiconductors 34 (2000) 998 – 1003

00-IMR0193
